Dallas County Health & Human Services Schedules Ground Spraying

Lancaster, TX – A West Nile Virus mosquito trap located in the 1500 block of Enchanted Lane, Lancaster, Texas 75134, has tested positive and was confirmed by Dallas County Health and Human Services. The City of Lancaster has coordinated with Dallas County Health and Human Services to conduct ground spraying for the area in which the positive trap was located. Ground spraying is scheduled for Tuesday, October 17th and Wednesday October 18th between 9:00 p.m. to 5:00 a.m.

Although the pesticide is approved by the Environmental Protection Agency, residents are advised to take the following precautions: Minimize exposure, remain indoors during the hours while spraying is in progress. Close windows and keep pets inside. If skin or clothes are exposed, wash them with soap and water. Rinse homegrown fruits and vegetables as a precaution. Cover small ornamental fish ponds and keep outdoor pets covered. The chemical breaks down quickly in sunlight and water, so no special precautions are suggested for outdoor swimming pools.

City of Lancaster residents are provided free insect repellent at 211 N. Henry Street while limited supplies last. The mosquito dunks assists in mosquito control by killing mosquito larvae when applied to water sources. For more information about ground spraying, please call the City of Lancaster, City Hall at 972-218-1300 or visit www.lancaster-tx.com/FightTheBite.
