Heavy Rains Cause Sanitary Sewer Discharges

Unprecedented rainfall in the North Texas region is entering Lancaster's wastewater collection system and have caused discharges in low-lying areas within the City. We are monitoring our lines to address the affect of the heavy rainfall on our sewer lines.

We are working to provide "relief" to residents in low-lying areas to minimize the impact. Staff is diligently working with our partners to address the issues.

We ask residents to report sewer issues to Community Relations Division (972) 218-1300 or after hours to (972) 218-2700.
