Dallas County Conducts Ground Spraying Due To Positive MosquitoTrap

Lancaster, TX – The City of Lancaster has coordinated with Dallas County Health and Human Services to conduct ground spraying for the area surrounding the 600 block of Pierson on August 28th and August 29th from 9:00 p.m. to 5:00 a.m. A positive West Nile Virus mosquito trap location in the city was confirmed by Dallas County in the specified area on August 28, 2013. Ground Spraying will be conducted in the approximate locations: east of N. Dallas Avenue, west of Ferris Road, south of Wintergreen Road and north of the 3300 block of Nokomis Road. Please be advised that the defined area may include some additional streets that may or may not receive spraying. The County will be focused on sites near the identified site where the positive mosquito trap was located.

Although the pesticide is approved by the Environmental Protection Agency (EPA), residents are advised to take the following precautions: Minimize exposure, remain indoors during the hours while spraying is in progress. Close windows and keep pets inside. If skin or clothes are exposed, wash them with soap and water. Rinse homegrown fruits and vegetables as a precaution. Cover small ornamental fish ponds and keep outdoor pets covered. The chemical breaks down quickly in sunlight and water, so no special precautions are suggested for outdoor swimming pools.

City of Lancaster residents are provided free mosquito dunks at 700 E. Main Street and 211 N. Henry Street while supplies last. This product assists in mosquito control by killing mosquito larvae when applied to water sources. Free mosquito repellent spray is also available. For more information about ground spraying, please call 972-218-1300 or visit www.lancaster-tx.com.
